TAX ID: 0 105 551028207

Email Panel Technical Sheet

Date: 22 August 2018

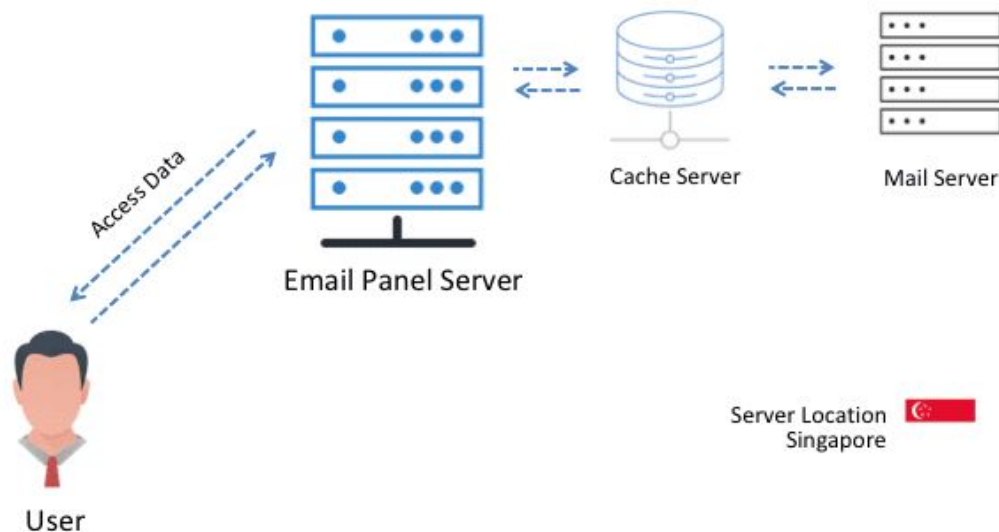

Introduction

Email Panel has been entirely developed by Technology Land Co., Ltd. We are determined to develop one of the best email panel systems in the world. Furthermore, we endeavor to put this email panel in the best position for middle-large sized corporates. The email panel supports collaborative operations and features with detailed tracking and logging, which can be customized to different levels of confidentiality, and a different scale of users.

Overall Structure

Owing to the big data generated by a large number of concurrent users, the Email Panel may experience delays in sending and retrieving data from the mail server. Some tasks with a high frequency of accessing are strengthened with the Cache Server, see Figure.
